## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 11, and 18-31, drawn to a self massage device, classified in class 601, subclass 134.
  - II. Claims 15-17, drawn to a method of administering self massage, classified in class 128, subclass 898.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case both of the above can be shown. The process of self massage as claimed by the applicant does not require using a massage apparatus with the claimed structural limitations of the apparatus claim. Likewise, the apparatus as claimed by the applicant is not limited to use on deep skeletal muscle fasciculi endomysium, but can be used on softer tissues.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3764

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
